🧠 TECHNICAL SKILLS

Data Engineering | ETL/ELT Development | Real-Time Stream Processing | Batch Data Processing | Data Modeling | Data Warehousing | Lakehouse Architecture | Change Data Capture (CDC) | Distributed Data Processing | Workflow Orchestration

🧩 TOOLS & TECHNOLOGIES:

Python | SQL | Apache Spark | PySpark | Spark Structured Streaming | Apache Kafka | Apache Airflow | Apache Iceberg | PostgreSQL | Redis | Debezium | Apache NiFi | MinIO (S3) | Docker | Git | GitHub Actions

🧩 PROFESSIONAL EXPERIENCE

Capgemini Technology Services India Ltd.

Data Engineer | IDFC FIRST Bank Project

Nov 2025 – Present | Mumbai

- Developed scalable ETL pipelines using PySpark, SQL, Hive, and Shell Scripting for large-scale data processing.
- Built and maintained Airflow workflows for automated data orchestration and scheduling.
- Optimized Spark applications and SQL queries to improve performance and processing efficiency.
- Worked with HDFS, AWS EMR, Hive, Git.
- Implemented data validation, reconciliation, and reporting processes to ensure data quality.
- Collaborated with cross-functional teams to deliver reliable data and analytics solutions.

📁 PROJECTS

Link : 🔗

Real-Time Fraud Detection Lakehouse | Kafka, Spark, Iceberg, Airflow

- Designed a **real-time** fraud detection system processing streaming credit card transactions using **Kafka** and **Spark Structured Streaming**.
- Implemented CDC pipelines with **Debezium** and **PostgreSQL** for automated dimension updates.
- Built an Apache **Iceberg** lakehouse on MinIO with ACID transactions, schema evolution, and time travel.
- Automated model retraining with **Airflow** and Spark **MLlib** (Random Forest) and deployed real-time fraud scoring to PostgreSQL and **Redis**.

Climate Change Impact Analysis

Aug 2025 – Sep 2025

- **Extract:** Collected deforestation and CO₂ emission datasets from **Kaggle** and **OWID**, and fetched real-time weather data via **Open-Meteo API**.
- **Transform:** Used **Scala** and **Apache Spark** to clean, transform, and aggregate large datasets for analysis.
- **Load:** Stored the processed data in **PostgreSQL** for efficient querying and analysis.
- **Visualization:** Developed interactive dashboards using **PowerBI** to provide actionable insights into climate change trends, including deforestation, CO₂ levels, and weather patterns.

🎓 EDUCATION

Bachelor of Engineering

St.Francis Institute of Technology, University of Mumbai

2021 – 2025 | Mumbai, India

Pursuing BE with the specialization in Electronics and Telecommunications with the Aggregate of 8.99 CGPA

🏆 ACHIEVEMENTS

One of Top 10 best Shooting Guard (SG) in Mumbai, U-14

Jr. NBA

2016

Won district level basketball tournament

District Sports Office (DSO)

2018

Awarded as BEST BASKETBALL TEAM CAPTAIN

District Sports Office (DSO)

2018
